

# Angular 15 已經修改了這個預設行為

- 必須手動加回

ng g environments --project mod10

- src\environments

```
environment.development.ts
export const environment = {
  production: false
  apiUrl :
'http://localhost:7144/MeetingRooms'
};
```

```
environmen.ts
export const environment = {
  production: true
  apiUrl :
'http://localhost/Mod09API/meetingrooms'
};
```

手動加入 production

# 佈署 mod10 專案

- Step1: 修改 mod10 的 這個檔案

## **shared\meeting-rooms.service.ts**

```
import { environment } from '../environments/environment';
```

...部分省略 ...

```
export class MeetingRoomService {
```

```
  public formData = new MeetingRoom();
```

```
  // rootUrl = 'https://localhost:7144/MeetingRooms'
```

```
  rootUrl = '';
```

```
  public list: MeetingRoom[] = [];
```

```
  constructor(private http: HttpClient) {
```

```
    this.rootUrl = environment.apiUrl;
```

```
  }
```

...部分省略 ...
